Yuvraj Angad Singh

Bengaluru, India | +919780081897 | LinkedIn | yuvrajangad.s@gmail.com | Website

Software Engineer with **5+ years of experience** building production AI systems at scale. Currently powering health decisions for **7M+ users** at **August AI** through multi-model orchestration, document intelligence, and real-time streaming. Previously built enterprise **GenAI solutions** at AntEngage. I work best in **early-stage teams** where I can own systems end-to-end.

EXPERIENCE

August AI

AI Engineer May 2025 - Present

- Architected **multi-model AI orchestration** with intelligent fallback across **OpenAI, Gemini, and Anthropic**, serving 7M+ users across 160 countries.
- Owned **document intelligence pipelines** processing lab reports and medical PDFs at scale — biomarker extraction, deduplication, and corrupt file detection.
- Built **real-time audio AI** with voice activity detection, function calling, and interrupt scheduling using Gemini.
- Developed **memory systems** enabling personalized AI responses through context retrieval and fragment deduplication.
- Built **multimodal processing** handling text, audio, and PDF inputs for health queries with **real-time streaming**.
- Developed **benchmarking frameworks** and **ML-based language detection** to continuously measure and improve model accuracy.

AntEngage Technology Pvt Ltd

Co-Founder & AI Lead April 2024 - May 2025

- Engineered a **GenAI platform** leveraging **Google AI and Vertex AI**, enabling Tier-1 support to resolve 80% of customer inquiries without escalation, decreasing Tier-2 workload by 40%.
- Delivered an **end-to-end paid PoC** for a large healthcare client, enabling secure handling of 5,000+ monthly support calls with **PII-safe transcription** and intelligent resolution workflows.
- Architected backend infra (**Python, MongoDB, GCP**) to support real-time **AI pipelines** handling 1M+ API calls/month, reducing response time by ~200ms.
- **Tuned prompts** and reranking strategies to boost LLM response quality by 35% and reduce latency by 50%.
- Drove **product ideation and GTM** alongside CXOs, converting enterprise trials into paid POCs within the first 3 months.

GeekyAnts India Private Limited

Software Engineer III May 2021 - March 2024

- Optimized **backend & AI models**, reducing response latency by 50% and elevating user engagement by 35%.
- Constructed an **IVR gateway routing** for Jio as a consultant, reducing wait times by 20%.
- Launched a **Business Chat App** processing over 10,000 messages daily.
- Drove **GCP migration**, cutting infra costs by 20% and boosting scalability.
- Streamlined **CI/CD with Docker**, enabling faster releases (2 weeks to 3 days).
- Mentored **4+ junior engineers** on clean code practices, reducing post-deployment issues by 30%.

OPEN SOURCE

19 PRs merged upstream into **GitHub CLI**, **OpenAI Codex**, **Google Gemini CLI**, **Google ADK**, **Expensify**, **Cal.com**, and **Rocket.Chat**. $750 in bounties.

Built **vibecheck** (AI code smell linter, 34 rules, CLI + GitHub Action + VS Code extension), **brandmd** (extract design systems from any URL), **greens** (mirror private contributions to GitHub), and **vemb** (CLI for embeddings). All on npm/PyPI.

EDUCATION

Chitkara University — **B.E. in Computer Science & Engineering** (CGPA: 9.27) 2021

SKILLS

Python, FastAPI, Node.js, Docker, Git, MongoDB, PostgreSQL, Azure, GCP, OpenAI, Anthropic, Gemini, RAG, Embeddings, Vector Search, LangChain, Real-time Streaming, CI/CD, GitHub Actions
